Digima DK7725 Wire EDM Machine

Digima DK7725 wire EDM machine — working travel 250 × 320 mm, table size 520 × 340 mm

CNC Wire EDM Machine

KARTA PRODUKTOWA

Digima DK7725 Wire EDM Machine

Compact CNC wire EDM machine for precision machining of small and medium-sized workpieces

Digima DK7725 is a compact CNC wire EDM machine designed for precision machining of metals. It is ideal for toolrooms, small and medium-sized production facilities, mould and die manufacturing, and any application where accuracy, reliability and repeatable cutting are essential.

The **DK7725** model offers a working table travel range of **250 × 320 mm**, the ability to machine workpieces with a height / cutting thickness of up to approximately **300 mm** and a maximum workpiece weight of approximately **200 kg**. Its compact design and machine weight of **600 kg** make it easy to install in smaller production spaces.

approx. 200 kg

Compact design, precision cutting and low operating costs.

The DK7725 combines a 250 × 320 mm working area, a 520 × 340 mm table, tapered cutting capability and the ability to accurately machine small and medium-sized metal components.

Key Advantages

Why choose the DK7725 wire EDM machine?

Table travel of 250 × 320 mm — a practical working range for precision machining of small and medium-sized workpieces.

Working table 520 × 340 mm — a compact working surface makes clamping and positioning workpieces easier.

KARTA PRODUKTOWA

Height / cutting thickness of approx. 300 mm — allows machining technical components with a practical working height.

Workpiece weight of approx. 200 kg — stable construction prepared for machining tooling and production workpieces.

Taper range $\pm 6^\circ$ / 80 mm — tapered cutting capability expands the machine's technological possibilities.

Compact machine weight of 600 kg — the machine is also suitable for smaller workshops and toolrooms.

DK7725 version — a machine designed for accurate WEDM machining of metal components.

Industrial applications — toolrooms, moulds, dies, steel machining and the production of precision workpieces.

Applications

What applications is the Digima DK7725 suitable for?

The Digima DK7725 wire EDM machine is designed for accurate machining of metal materials, especially where traditional cutting methods are insufficient or cannot achieve the required geometry. The machine enables the cutting of precise contours, holes, technical shapes and forming components.

Mould production — manufacturing precise mould components and working cavities.

Dies and stamping tools — machining components requiring high shape accuracy.

Toolrooms — manufacturing and refurbishment of tooling components.

Machining steel and hardened components — precision cutting of workpieces made from more difficult materials.

CNC facilities — complementing machine fleets with compact WEDM technology.

Precision workpieces — machining components requiring accuracy, repeatability and stable cutting.

Technical Specifications

Technical Parameters – Digima DK7725

Model **DK7725**

Machine Type **CNC Wire EDM Machine**

Brand **Digima**

Condition **New**

Working Table Size **520 × 340 mm**

X/Y Table Travel **250 × 320 mm**

Maximum Height / Cutting Thickness **approx. 300 mm**

Taper Range **±6° / 80 mm**

Maximum Workpiece Weight **approx. 200 kg**

Machine Weight **600 kg**

Machine Dimensions **1450 × 900 × 1500 mm**

Main Applications **Mould and die production, toolrooms, machining steel and hardened components, precision mechanical workpieces, CNC facilities**
