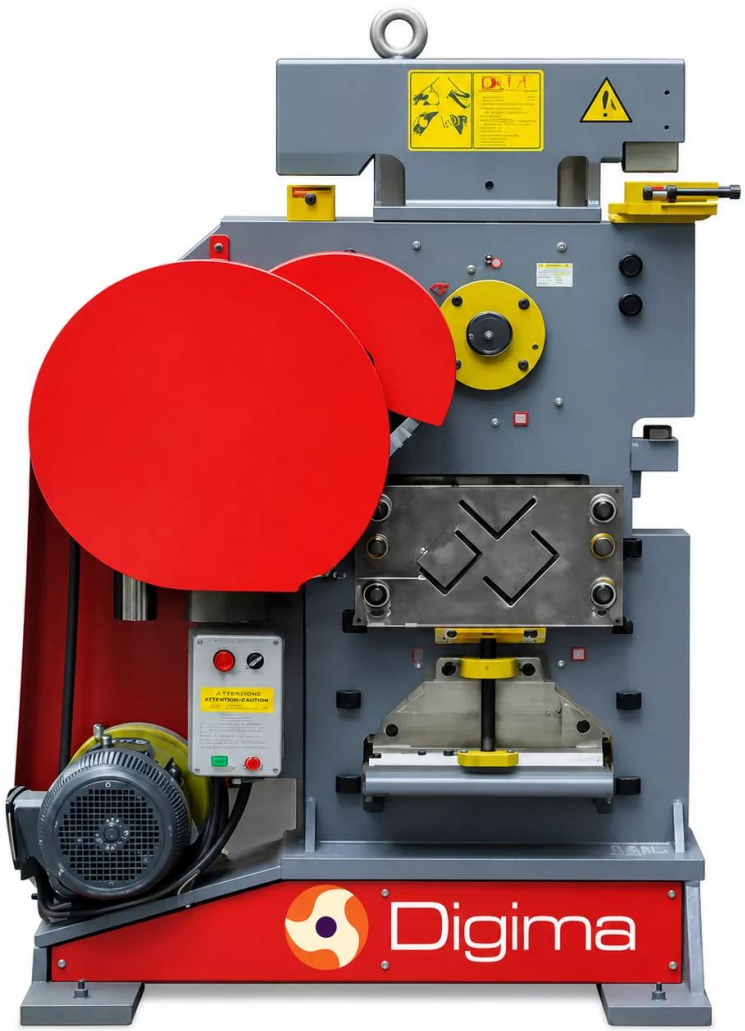
KARTA PRODUKTOWA

Digima QA32-12B 900 kN Punching Machine



KARTA PRODUKTOWA

Punching and Cutting Press

Digima QA32-12B
900 kN Punching Machine

A professional, multifunctional metalworking machine for workshops, production plants and metal fabrication companies.

QA32-12B is a Digima punching and cutting press with a **900 kN** shear force, designed for intensive metalworking. The model combines punching-machine and shearing functions, allowing multiple operations to be carried out on a single machine.

The machine enables punching round and elongated holes, cutting flat steel, round bar, angle steel and channels, as well as trimming and processing various steel profiles. Its high shear force makes it suitable for heavier workpieces and more demanding workshop applications.

Shear Force **900 kN**
Machine Model **QA32-12B**
Max. Flat Steel Cutting **330×12 mm**
Total Power **4,0 kW**

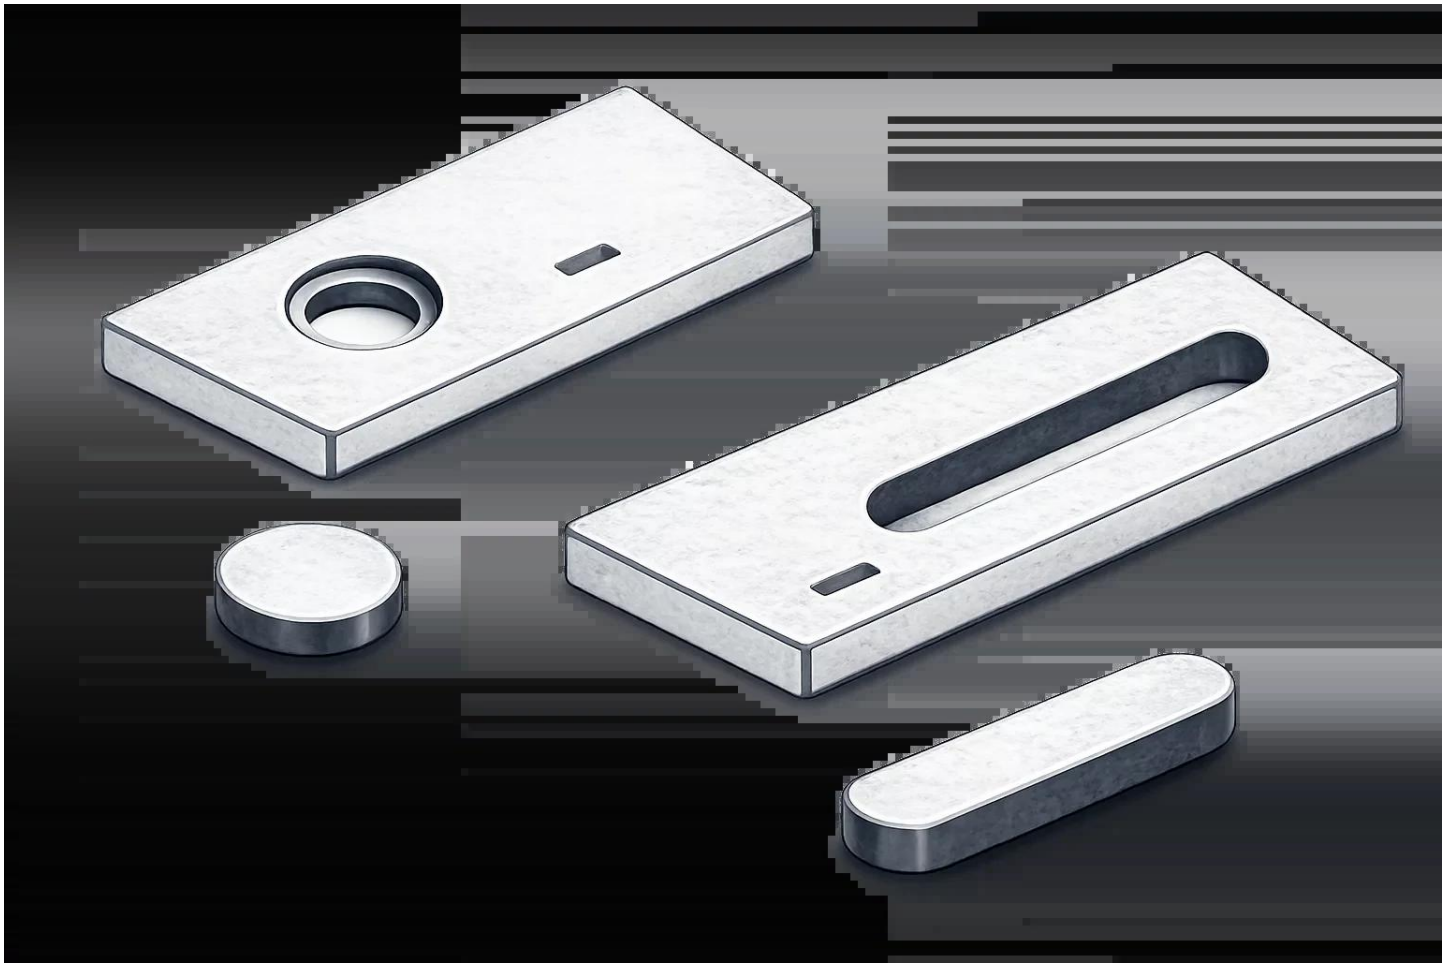
Applications

One Machine — Multiple Metalworking Operations

QA32-12B helps reduce the number of separate workstations. With one machine, you can punch, cut, notch and prepare steel components for further production or assembly.

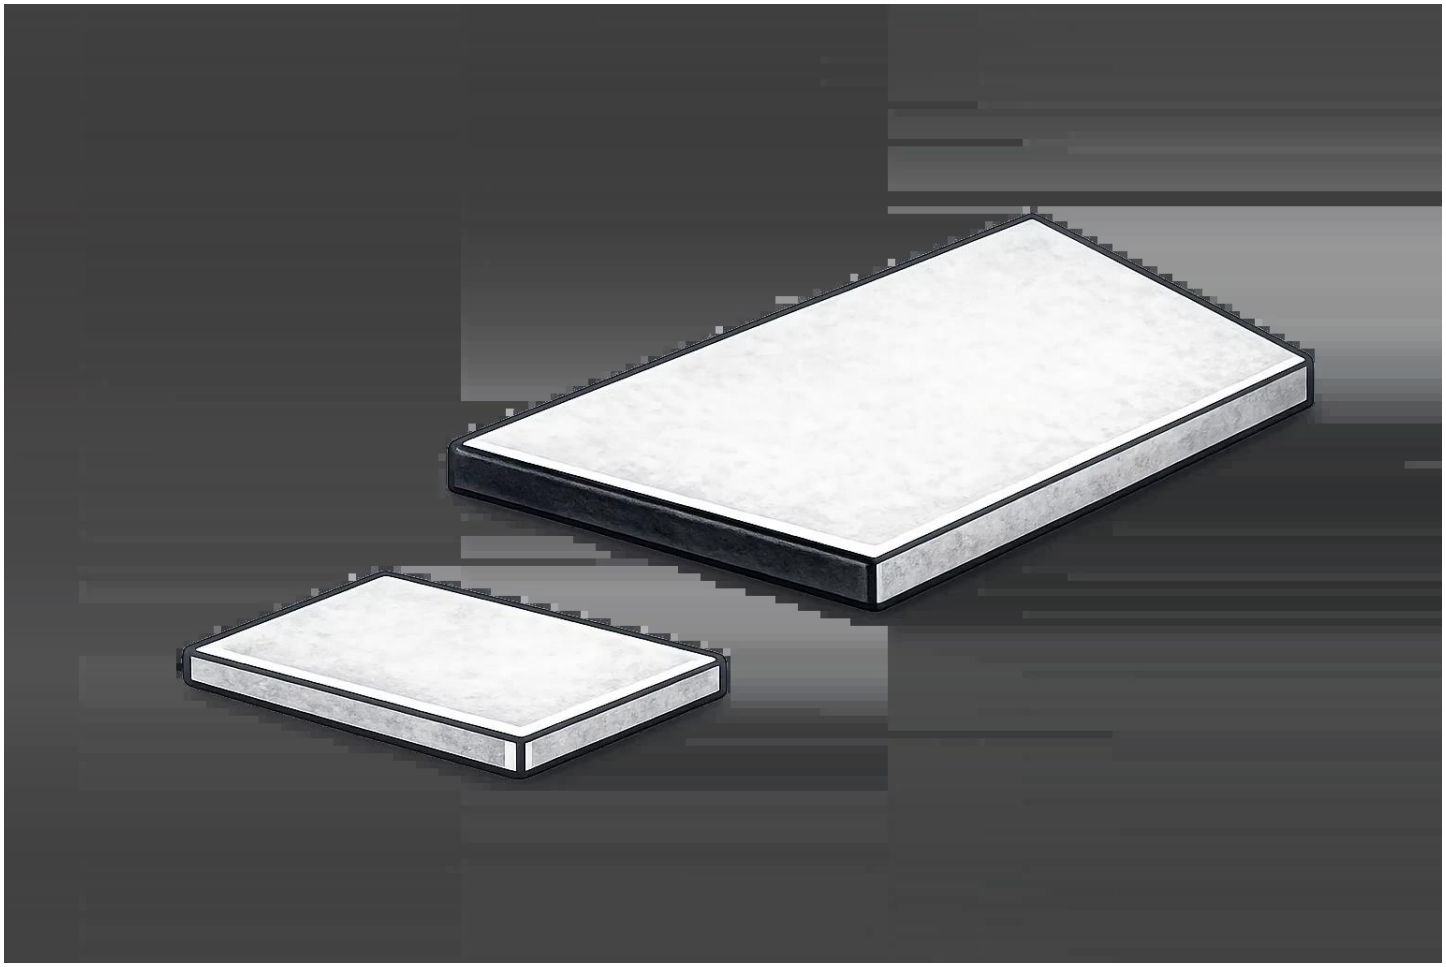
KARTA PRODUKTOWA



Hole Punching

The machine enables punching round and elongated holes in steel components.

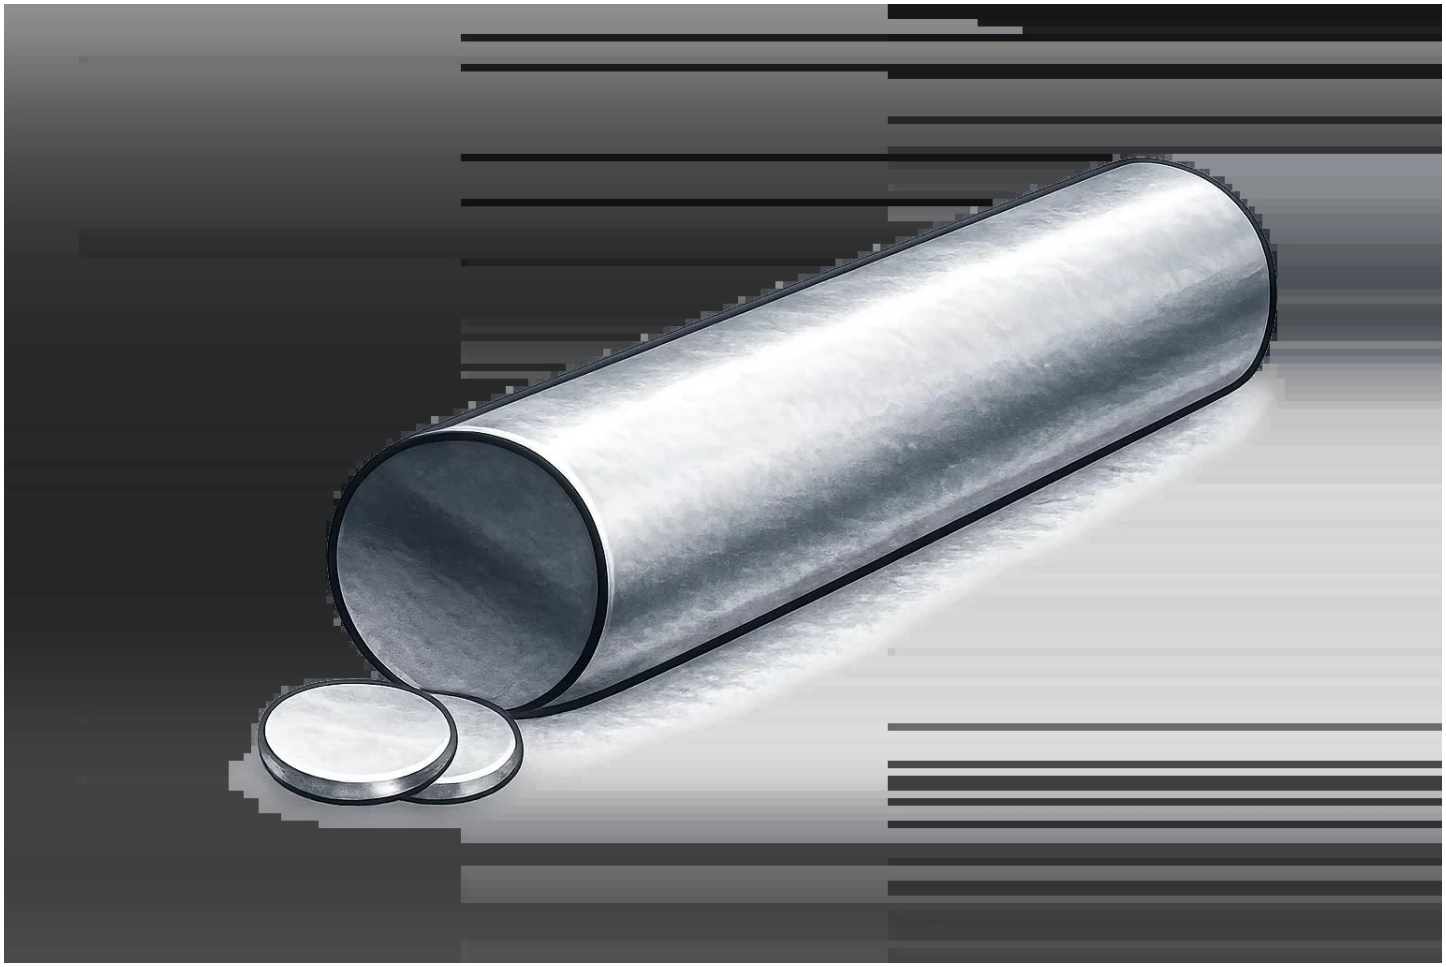
KARTA PRODUKTOWA



Flat Steel Cutting

QA32-12B can cut flat steel up to 330×12 mm, making it suitable for preparing robust structural components.

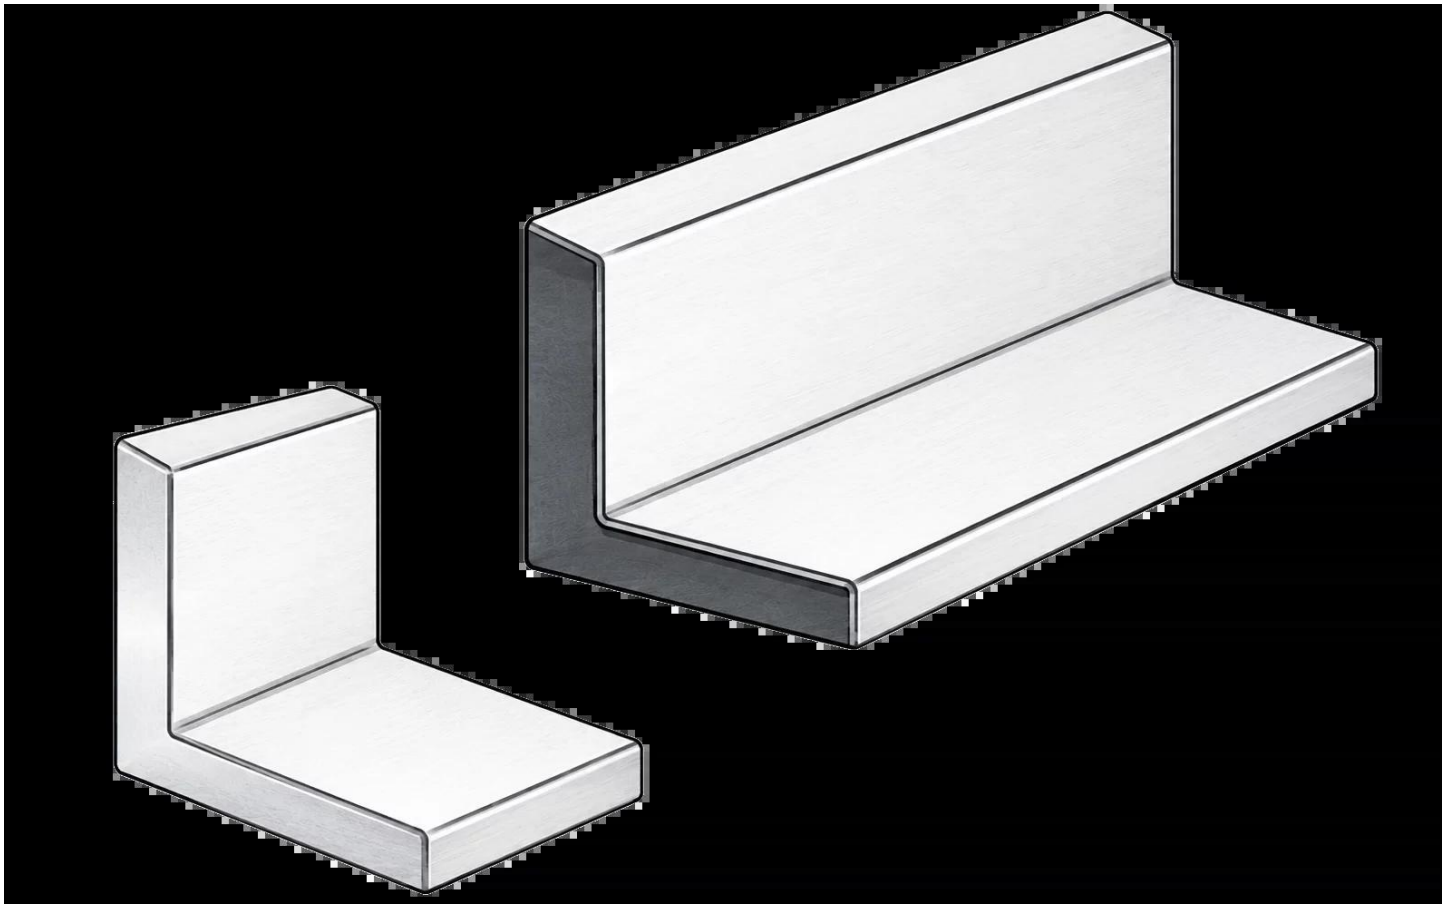
KARTA PRODUKTOWA



Round Bar Cutting

The machine enables cutting round steel, bars and round-section components up to 40 mm.

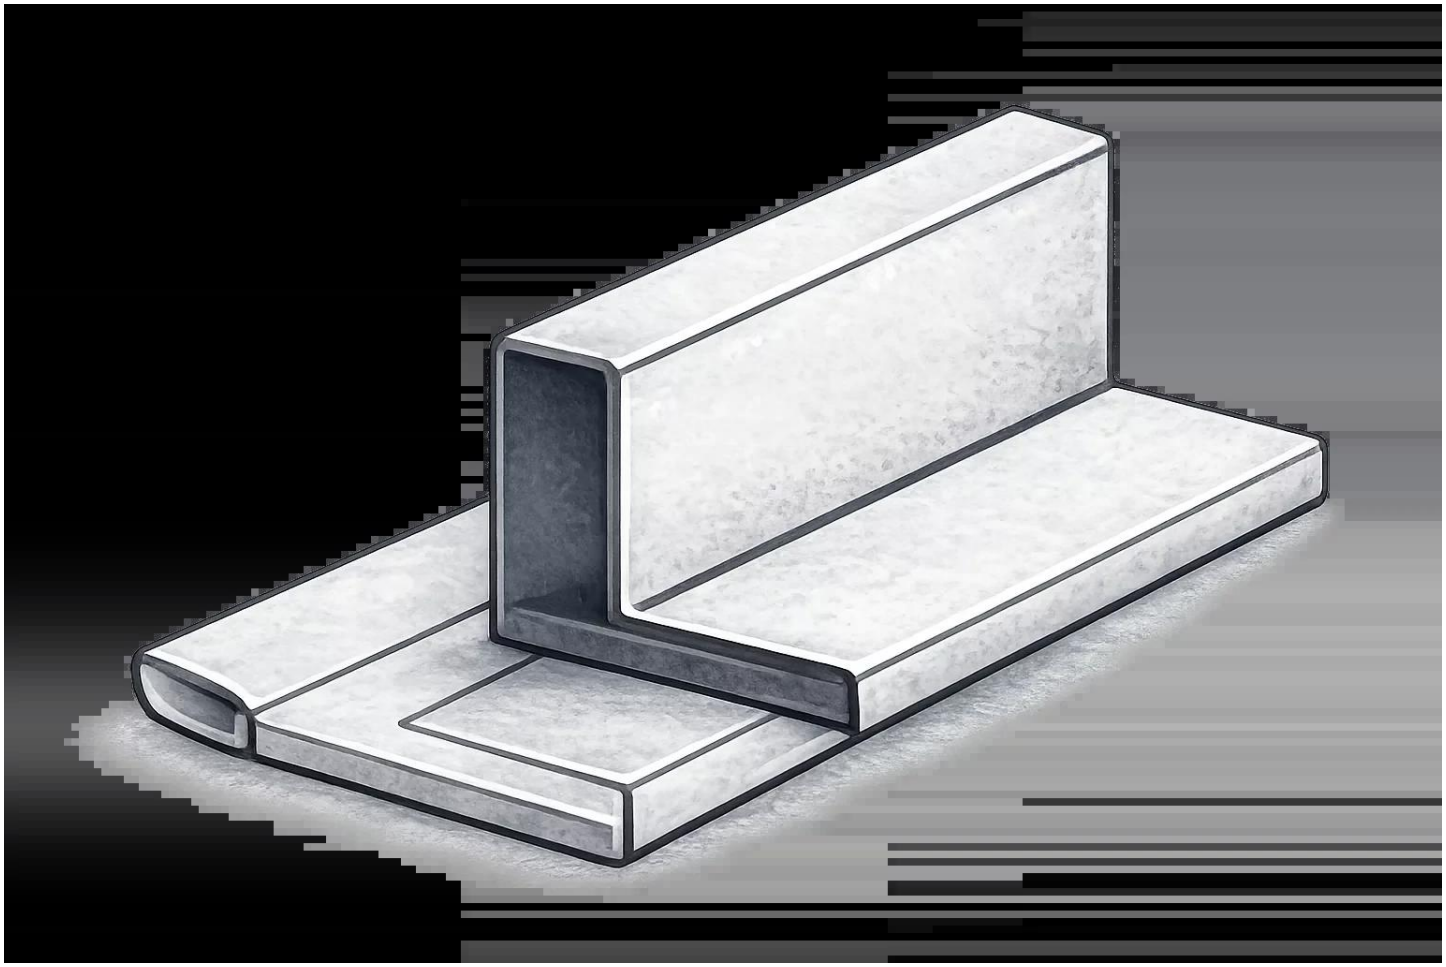
KARTA PRODUKTOWA



Angle Steel Cutting

The punching machine can process steel angles up to 125×125×12 mm.

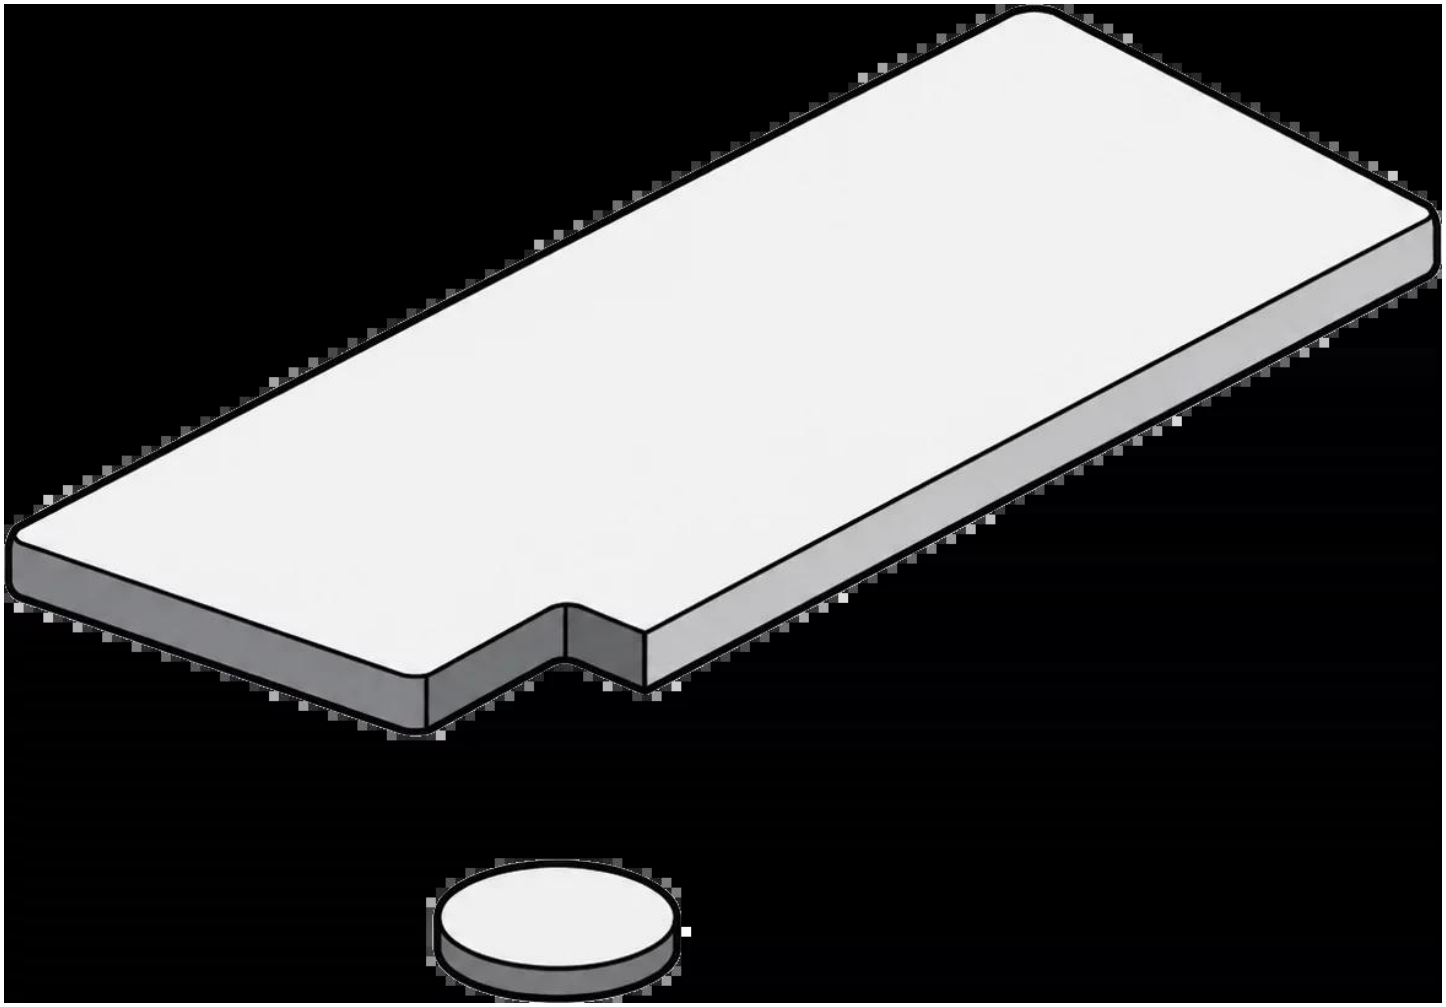
KARTA PRODUKTOWA



Channel and Profile Cutting

The machine enables trimming channels and processing various steel profiles in production work.

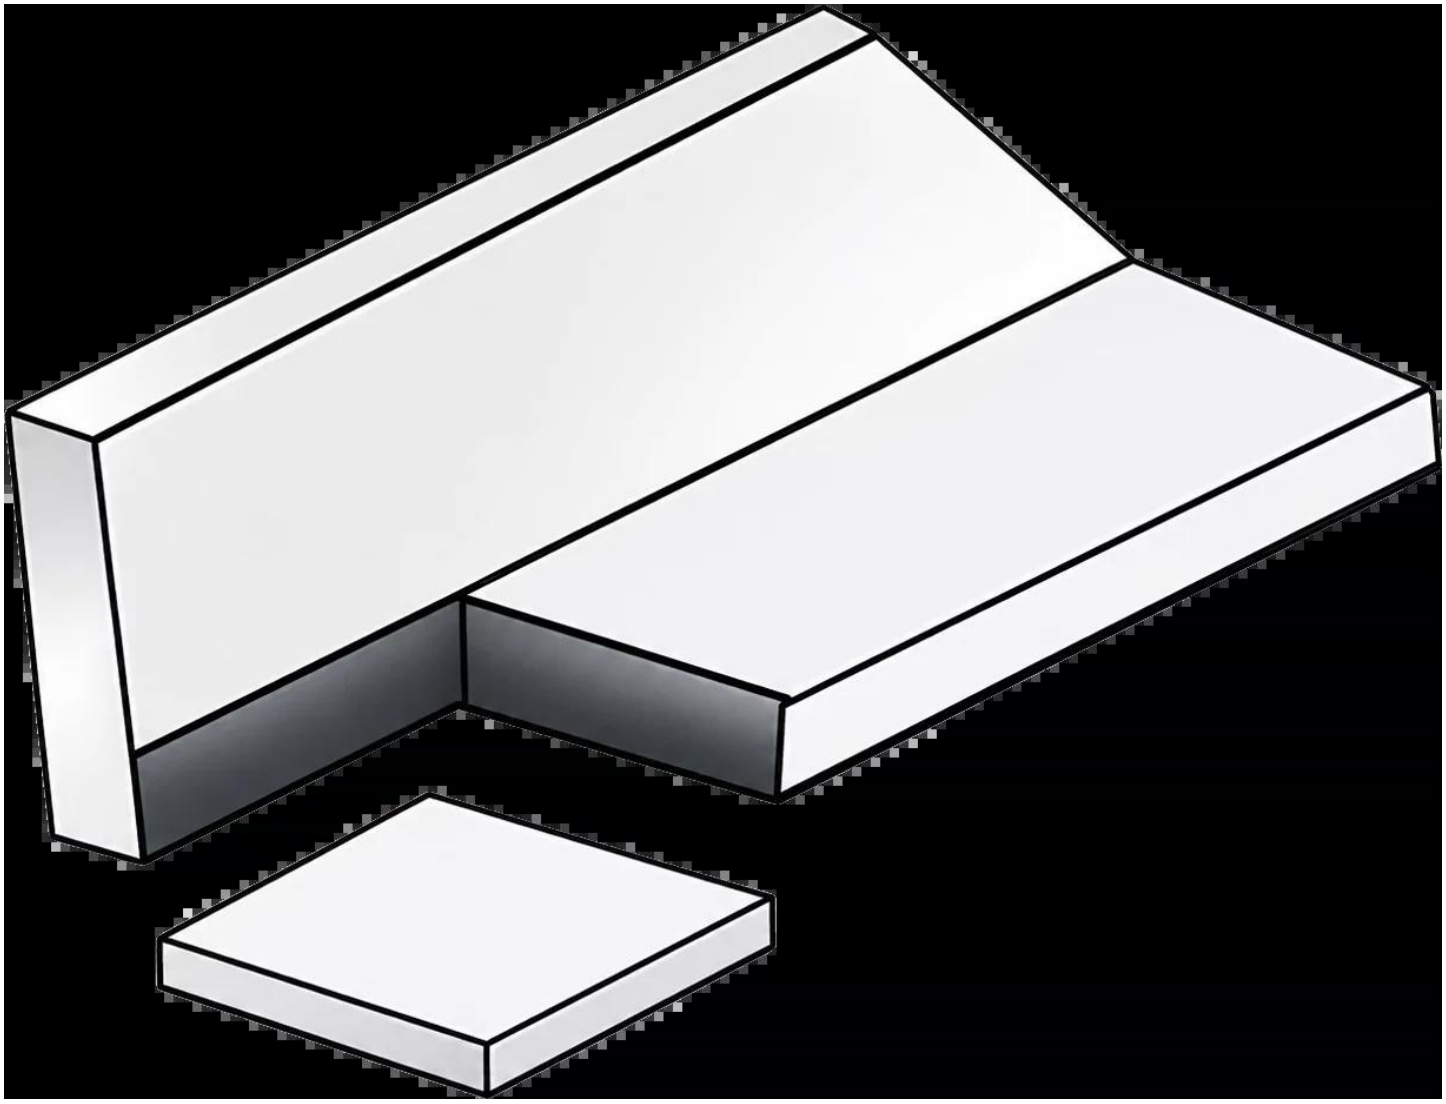
KARTA PRODUKTOWA



Steel Plate Cutting

The press enables cutting components from steel plates and preparing them for further production.

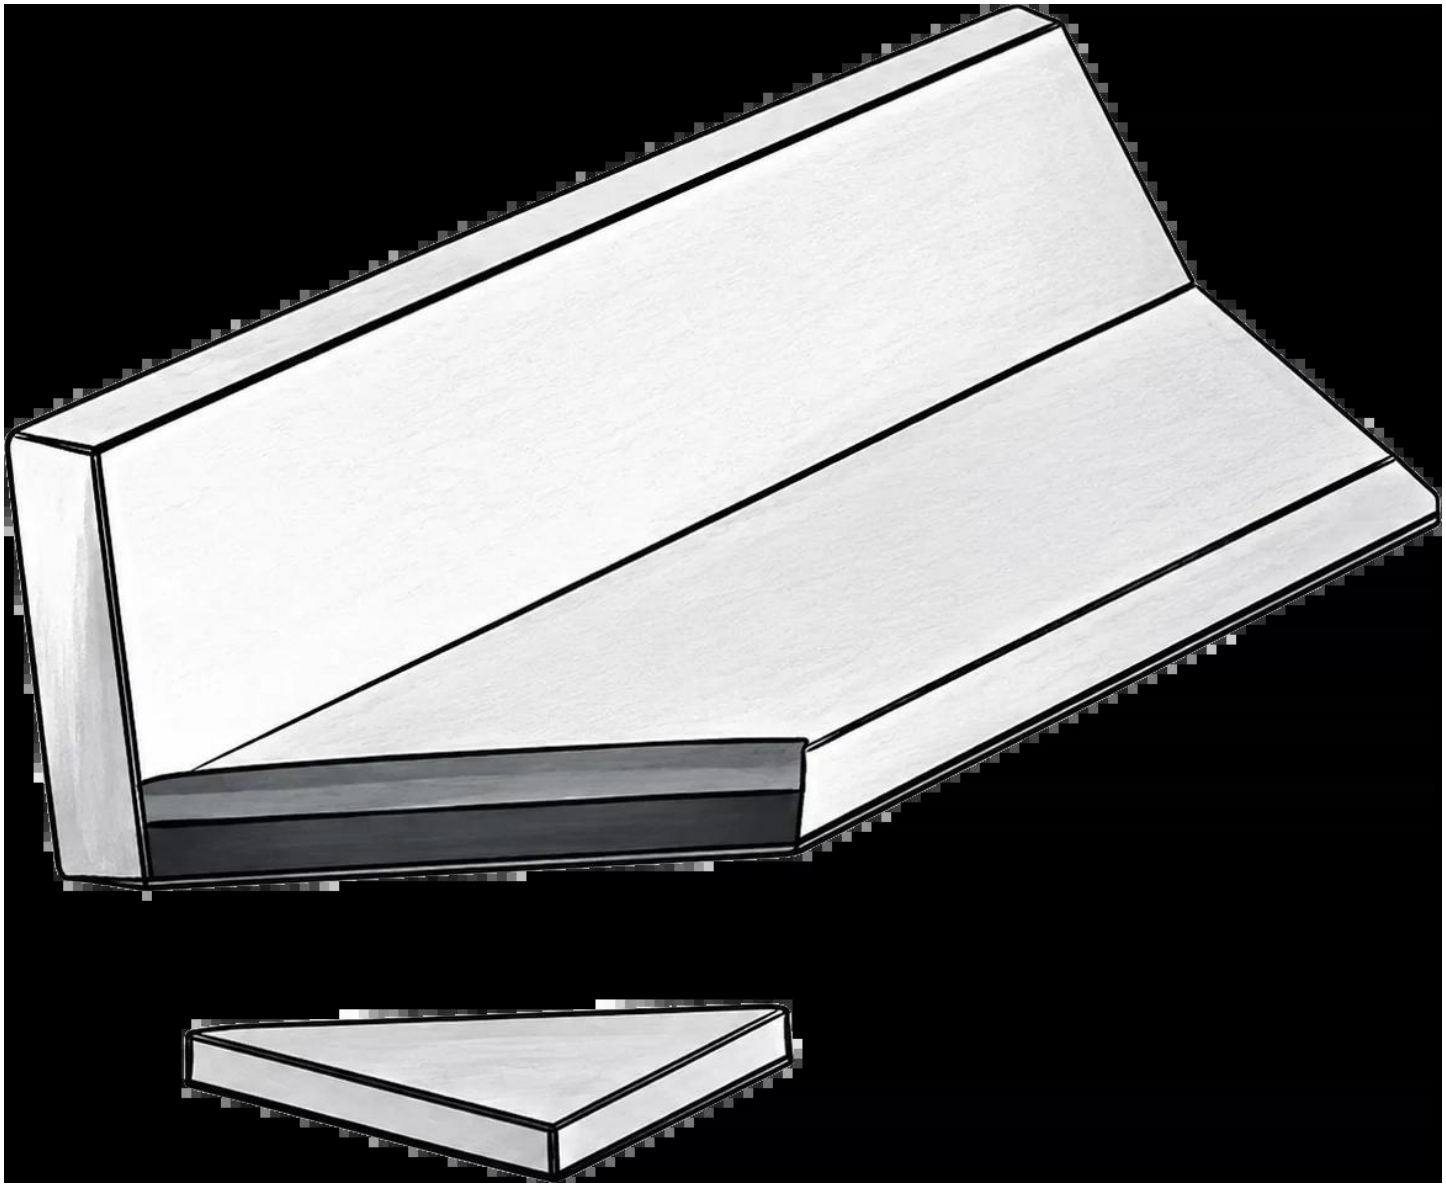
KARTA PRODUKTOWA



Angle Steel Sectioning

The machine enables repeatable sectioning of steel angles in workshop and production work.

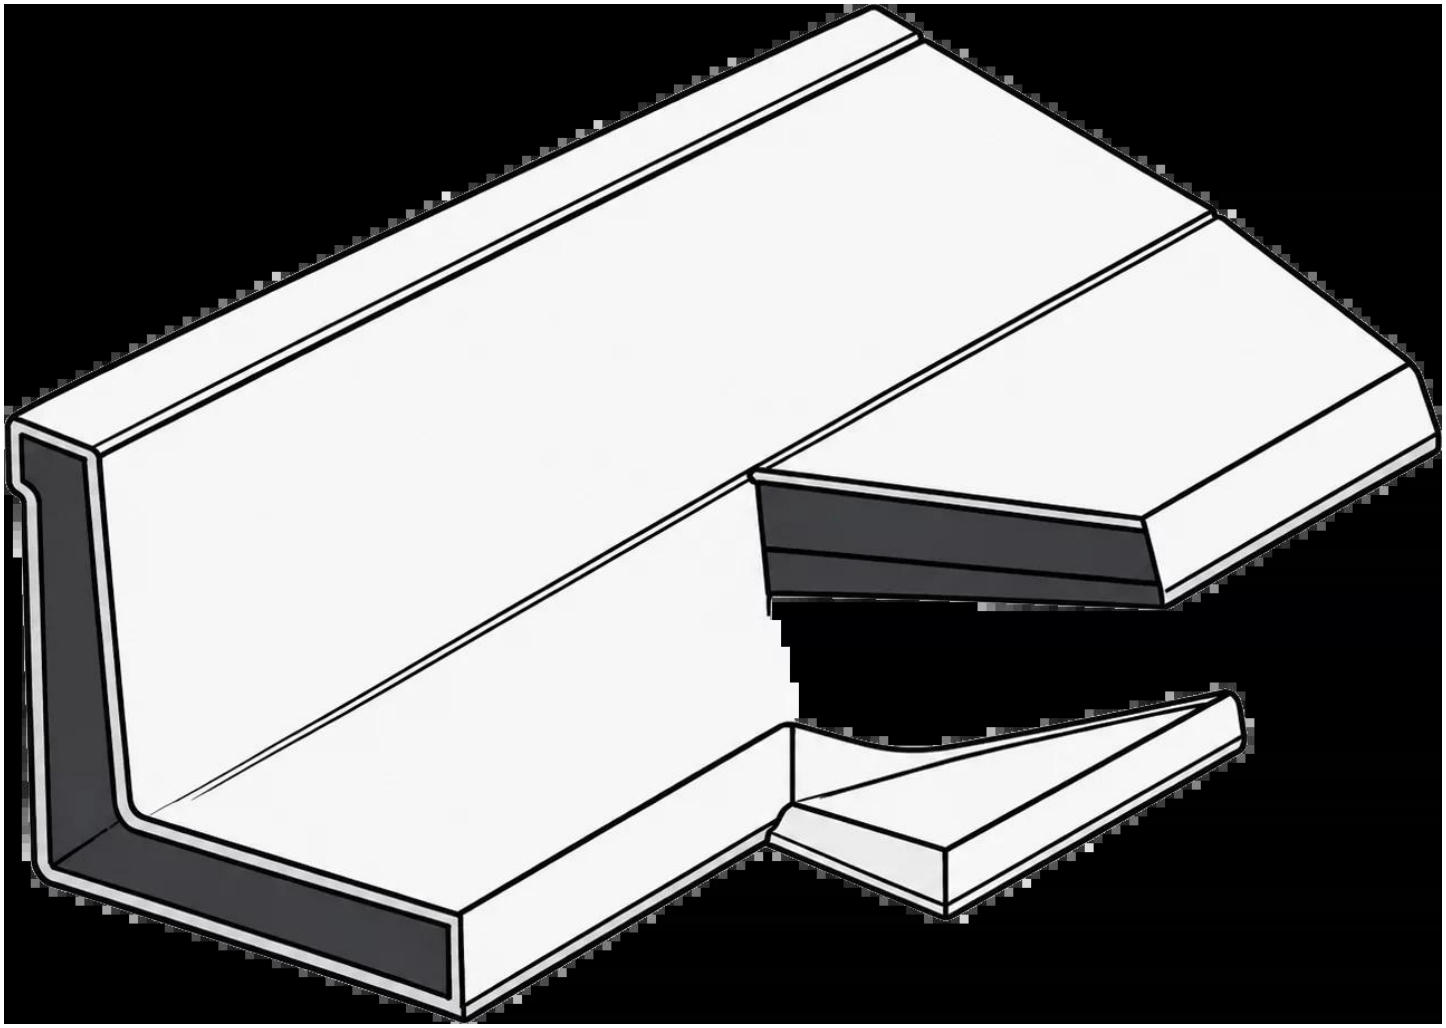
KARTA PRODUKTOWA



Cutting at an Angle

The machine facilitates cutting angles at an angle and preparing structural components for assembly.

KARTA PRODUKTOWA



Angle Steel Notching

QA32-12B is suitable for notching, cutting and processing steel angles.

On our YouTube channel **@Digima_DC**, you can see how our punching machines perform in practice and how they handle a variety of steel components.

Key Advantages

High-Performance 900 kN Punching Machine for Intensive Metalworking

900

Very High Cutting Force

A shear force of up to 900 kN enables efficient processing of heavier steel components.

KARTA PRODUKTOWA

9w1

Multifunctionality

Several operations in one machine: punching, cutting flat bar, bars, profiles and angle steel.

High Productivity

Up to 30 strokes per minute supports efficient, repeatable work in production and workshops.

IND

Industrial Construction

The robust machine design supports stable operation during intensive metalworking.

Compact Dimensions

Dimensions of 1100×700×1450 mm make it easier to position the machine in a workshop or production facility.

Various Steel Profiles

QA32-12B enables work with flat bar, bars, angles, channels and profiles.

Technical Specifications

Technical Data — Digima QA32-12B

The table below presents the technical data of QA32-12B — a powerful punching and cutting press for steel components with a 900 kN shear force.

Technical Specifications – QA32-12B
Parameter
Value
Weight**700 kg**
Machine Model**QA32-12B**
Maximum Flat Steel Cutting Thickness**330×12 mm**
Shear Force**900 kN**

Round and Elongated Hole Diameter**22 / 12 mm**
Tool Stroke**36 mm**
Maximum Angle Steel Size**125×125×12 mm**
Maximum Round Steel Cutting Thickness**40 mm**
Total Power**4,0 kW**
Power Supply**200 V / 230 V / 380 V / 415 V**
Number of Strokes**30 strokes/min**
Machine Dimensions**1100×700×1450 mm**
Packaging Condition**Original**

Digima QA32-12B — Powerful 900 kN Punching Machine for Demanding Metalworking

QA32-12B is a solution for companies that need one robust and multifunctional machine for multiple tasks. The machine streamlines steel-component preparation, reduces working time and expands workshop capabilities without the need to invest in several separate workstations.
