Double-Column Lathe

KARTA PRODUKTOWA

DTL-35 Double-Column Vertical Turning Lathe

Double-column vertical turning lathe for heavy machining of workpieces with turning diameters up to 3500 mm

DTL-35 is a heavy-duty vertical turning lathe of the **double-column** type, designed for machining large and massive components in industrial, power generation, mining and manufacturing facilities.

The design is based on a rigid, symmetrical arrangement, a robust working table, two working heads and guideways designed for high-load operation. The DTL-35 model offers a turning diameter of up to **3500 mm** and a table diameter of **2800 mm**.

3500

Max. Turning Diameter

3500 mm

2800

Table Diameter

2800 mm

12T

Table Load Capacity

12 t, optional 20 t

55

Main Motor Power

55 kW

Heavy-duty machine for large industrial components.

The DTL-35 combines a robust double-column construction, two working heads, hydrostatic table bearings, 40Cr steel gearboxes and PLC control for safe and repeatable operation.

Key Features of the DTL-35

High-quality castings and a rigid, symmetrical double-column construction.

40Cr alloy-steel gears and forged shafts in the gearbox.

Two working heads – one for finish turning and the other for rough machining.

Hydrostatic bearings enabling machining of heavy workpieces.

4-jaw chuck with auxiliary T-slots for secure workpiece clamping.

Ram head with a swivel range from -30° to +30° for machining tapered surfaces.

Wear-resistant guideways with a ZnAl10-5 alloy lining for smooth movement.

PLC control ensuring safe and reliable machine operation.

Applications

Where is the DTL-35 lathe suitable?

The DTL-35 is designed for machining large, heavy and oversized components, especially where high system rigidity, a stable working table and safe workpiece clamping are required.

Heavy industry – machining large housings, rings, discs and machine components.

Power generation – turbine elements, flanges, plant components and generator subassemblies.

Mining – large machine parts, housings, wheels, rollers and drive components.

Structural fabrication – welded components, rings, plates and workpieces requiring vertical turning.

DTL-35 Specifications

KARTA PRODUKTOWA

Technical Specifications for the DTL-35 Model

Model **DTL-35**

Machine Type **Vertical Turning Lathe – double-column vertical turning lathe**

Version **Double-column, Manual / DRO**

Maximum Turning Diameter **3500 mm**

Table Diameter / Size **2800 mm**

Maximum Workpiece Height **1800 mm, opcjonalnie 2500 mm**

Table Load Capacity **12 tonnes, optional 20 tonnes**

Main Motor Power **55 kW**

Number of Working Heads **2 heads – for rough and finish machining**

Head Swivel Range **-30° to +30°**

Workholding Chuck **4-jaw chuck with auxiliary T-slots**

Gearbox **40Cr alloy-steel gears and forged shafts**

Table Bearings **Hydrostatic bearings for high-load operation**

Guideways **Wear-resistant ZnAl10-5 alloy lining**

Control **PLC; Manual / DRO version available**

Standard Equipment **Chuck jaws, tool holder, leveling wedges and screws, hand tools, oil can**

Optional Equipment **DRO, oil cooler, chip conveyor, milling head, grinding head**

Applications **Heavy industry, mining, power generation, structural fabrication, machining large components**
